INTERNET MULTIFEED CO.

Efforts in JPNAP for widespread use of IPv6 **~ Launch of IPv6 promotional campaign in JPNAP Tokyo I Service ~**

INTERNET MULTIFEED CO. ("MF"; Head Office: Chiyoda-ku, Tokyo; President and CEO: Koichi Suzuki) in June 2002 began to provide the "JPNAP6 (Trial)" Internet exchange (IX) service supporting the IPv6 native connection environment (*1), and in April 2008 launched full-scale support for IPv6 in its JPNAP services based on the operation technologies and expertise that MF had gained with the "JPNAP6 (Trial)" service to contribute to the propagation of IPv6.

Now that the problem of IPv4 address exhaustion has reached a critical stage, MF is launching IPv6 promotional campaign for a limited time.

MF is committed to playing a pioneering role in continued growth of the Internet, providing services that support this growth and that contribute to improving the reliability of vital public infrastructure.

1. Campaign Details

During the period of campaign, the monthly fee for the JPNAP Tokyo I Service FE Port (IPv6 native) will be waived.

* The initial fee (100,000 yen, excluding consumption tax) will be required at the time of application.

* The initial fee will be waived for current "JPNAP6 (Trial)" customers.

2. Campaign Period

April 1, 2010, through March 31, 2011

3. Others

As announced previously, the "JPNAP6 (Trial)" service will end on March 31, 2010. From then on, IPv6 traffic exchange on JPNAP will be called "JPNAP6", and MF will promote IPv6 under this brand name.

*1 This environment transmits IPv6 data as is over the Internet.
